---

Hi Chris,

There has been natural gas leaking from a well in So Cal Gas' Aliso Canyon storage facility near Northridge since Oct 22, and residents in the area have been bothered by the smell. A homeowner (Steve Kuh, cell 818-437-2113) has called the Spillphone this morning wanting to talk to someone at EPA about if there is a health hazard.

Would you be able to talk to him about this incident, or do you know of someone else at EPA to refer him to? Or, I could I refer him to the South Coast AQMD.

I can send you the reports and a news article.

Thanks, Rameen
